

# ECE LENS CODE DECODER — QUICK REFERENCE

Keep in the glovebox. Full guide: [vlandeu.com/resources/e-mark-ece-lighting-guide](https://vlandeu.com/resources/e-mark-ece-lighting-guide)

E# — Approval authority identifier near the circled E (e.g., E9, E13).

HCR — Halogen headlamp, combined low + high beam

HC / HR — Halogen low / high beam

DCR — Gas-discharge (HID), combined low + high beam

DC / DR — HID low / high beam

RL — Daytime running lamp

A — Front position (parking) lamp

PL — Plastic lens material marking

Reference number (e.g., 12.5) — Used to cap total high-beam intensity when multiple high beams are fitted

Tip: Codes are grouped with approval numbers; function presence varies by model. For full decoding and examples, see the live guide.
